DETAILED ACTION

Remarks

1. Applicants elect Group II (claims 6-10, 11-17, and 22-~~25~~ **not 23**) for examination. Please note, group II as noted and group III includes claims 18-19, and 20-21 (not 22), as mistakenly noted in the earlier action.

Applicant's election with traverse of all claims 1-25 in Paper No. 6 is acknowledged. The traversal is on the ground(s) that claims 1-25 are related and a complete search for the subject matter of the elected claims would necessarily encompass a thorough and complete search for the subject matter of the non-elected claims. This is not found persuasive because the Examiner clearly stated in the last Office Action (Paper No.4) that the search for the invention (Claims 1-5) does not require a search for either the invention II (claims 6-10, 11-17, and 22-25 as corrected above) or invention III (claims 18-19, and 20-21 as corrected above). It is further noted that the inventions I, II, and III are distinct from each other because the invention I is mutually exclusive from either the invention II or III.

In view of above reasons, the requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

2. Claims 11-17 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or suggest "a method for storing EIT data in a set top box, comprising the steps of: (a) receiving a segment of EIT data; (b) storing said segment; (c) creating an event instance data structure associated with a particular event in said segment; (d) extracting event-related data pertaining to said particular event; (e) comparing the extracted event-related data to event-related data previously stored in an event-related data table; (f) obtaining an event data structure pointer to detailed data associated with said particular event from said event-related data table if a match occurs in step (e); (g) storing said event data structure pointer in said event instance data structure; and (h) storing said event instance data structure in an event instance table" as cited in claim 11.

Claim Objections

4. Claims 22-25 are objected to because of the following informalities:

Claim 22 recites the limitation "~~the~~ inherent redundancy of the EIT data" in the claim language. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-10 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Regarding claims 6, 7 and 23, the phrase "or the like" and/or "for like", e.g., "like events" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like" or similar), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).
